November 8, 2009

Dear physicians and pharmacists,

Viet Nam Medical Assistance Program (VNMAP) is a young organization that was established by a group of professional students who want to give back to the global community through their humanitarian services. VNMAP focuses on improving the health of the poor in Viet Nam by providing free health care, medicine, health education, and health survey. At the same time, VNMAP wants to provide young professional students an opportunity to gain clinical and cultural experience through serving people.

Since service and education are the central values of VNMAP, we want to extend an invitation to physicians, nurse practitioners, and pharmacists who share the same values as part of our 2010 medical mission team. As health professionals of VNMAP, you will play an important role in caring for patients, supervising and teaching students, and providing professional input in the planning process. This is a wonderful opportunity for you to serve the poor, learn about the Vietnamese culture and practice of medicine, and enhance your teaching skills.

The 2010 medical mission will be from **June 14th to June 29th, 2010**. In this mission, the team will serve at village in Mekong Delta Region in the South of Viet Nam.

If you have any other questions about VNMAP or would like to support us, please do not hesitate to contact us at VNMAPteam@vnmap.org or visit our website at www.vnmap.org. We look forward to working with you in the 2009 medical mission trip.

Sincerely,

Nguyen Khoi Nguyen
President of VNMAP Program
